

Phenolics metabolism provides a tool for screening drought tolerant *Eucalyptus grandis* hybrids

Clarice Noletto Dias, Edgard Augusto de Toledo Picoli*, Genaina Aparecida Souza, Mohamed Ali Farag, Marcus Tullius Scotti, José Maria Barbosa Filho, Marcelo Sobral da Silva, Josean Fechine Tavares

Table S1. Identification, pedigree and field resistance to dieback according to historical registers in field conditions of Suzano Pulp and Paper commercial plantation areas.

| Genotype | Pedigree | Field information on the tolerance to dieback/water stress |
|----------|---|--|
| EGU1 | <i>E. grandis</i> W. Hill × <i>E. urophylla</i> S. T. Brake | tolerant |
| EGU2 | <i>E. grandis</i> W. Hill × <i>E. urophylla</i> S. T. Brake | moderately tolerant |
| EGU3 | <i>E. grandis</i> W. Hill × <i>E. urophylla</i> S. T. Brake | * not available |
| EGR | <i>E. grandis</i> hybrid | Susceptible |

*genotype in test phase.
