^a Means followed by the same lowercase letter in the row and upper case in the column do not differ statistically by the Tukey's test between rows and Scott-Knott between columns at $p \leq 0.05$ of significance. Cont. Control; Dro. Drought.

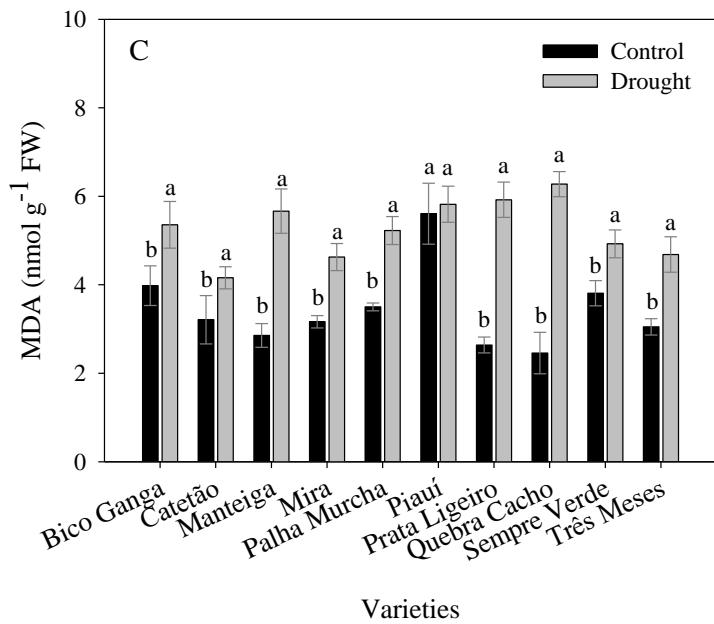

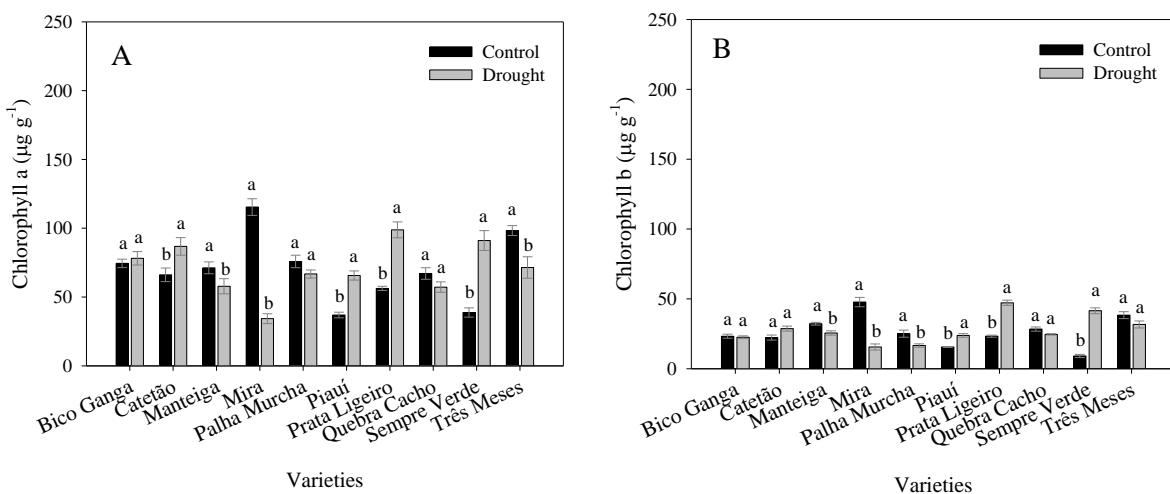

Figure S1. Relative water content (RWC. %) (A), electrolyte leakage (EL. %) (B) and lipid peroxidation (MDA. g-1 MF) of leaves +2 (C) from ten upland rice varieties submitted to control and drought treatment during the reproductive stage. Same letters do not differ statistically by the Tukey's test at $p \leq 0.05$ of significance. Standard errors represent averages of 4 replicates per treatment.

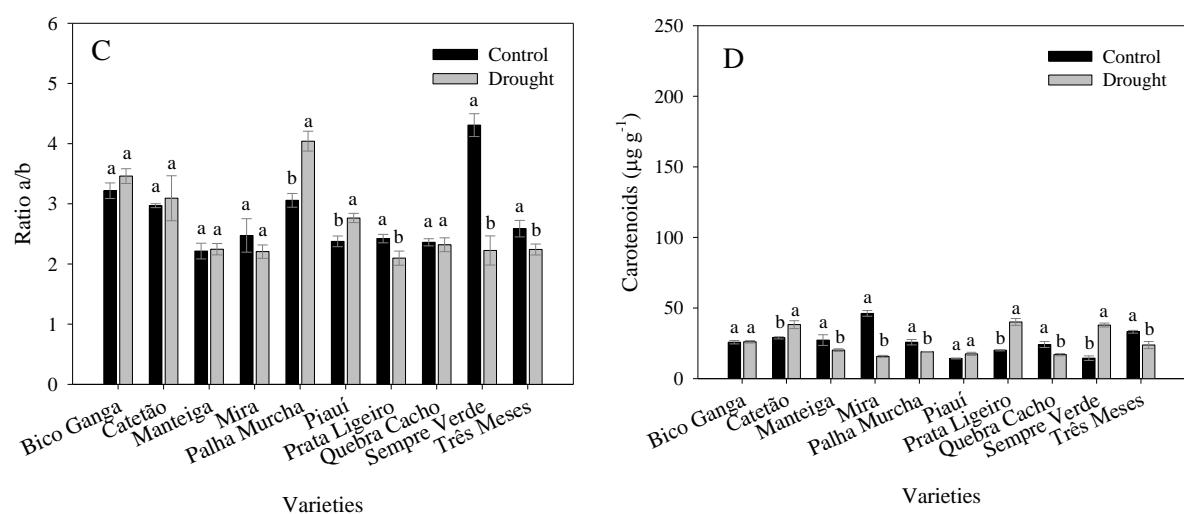

Figure S2. Chlorophyll a (A), chlorophyll b (B), ratio a/b (C) and carotenoids (D) from the leaf blade of ten upland rice varieties submitted to control and drought treatment during the reproductive stage. Same letters do not differ statistically by the Tukey's test at $p \leq 0.05$ of significance. Standard errors represent averages of 4 replicates per treatment.
